

# React-native-messages-directory

This mobile application is built using **React Native (with Expo)**. It allows users to view personalized “message directories” for family and friends, each represented by an emoji-tagged circular button. Long-pressing any category brings up a modal to **rename**, **delete**, or **cancel**, and the app supports **dark mode switching**.

## Features

- Categorized inboxes (Mom, Dad, Sister, Friends, etc.)
- Tap to view a list of encouraging messages
- Long press to **Rename** or **Delete**
- **Dark mode** toggle
- Clean UI with emojis and smooth interactions

## How to Run

### Prerequisites:

- Node.js & npm installed
- Expo CLI (npm install -g expo-cli) or use npx
- Android Studio with an emulator OR Expo Go app on mobile

- **Installation:**

```
git clone https://github.com/your-username/react-native-messages-directory.git
```

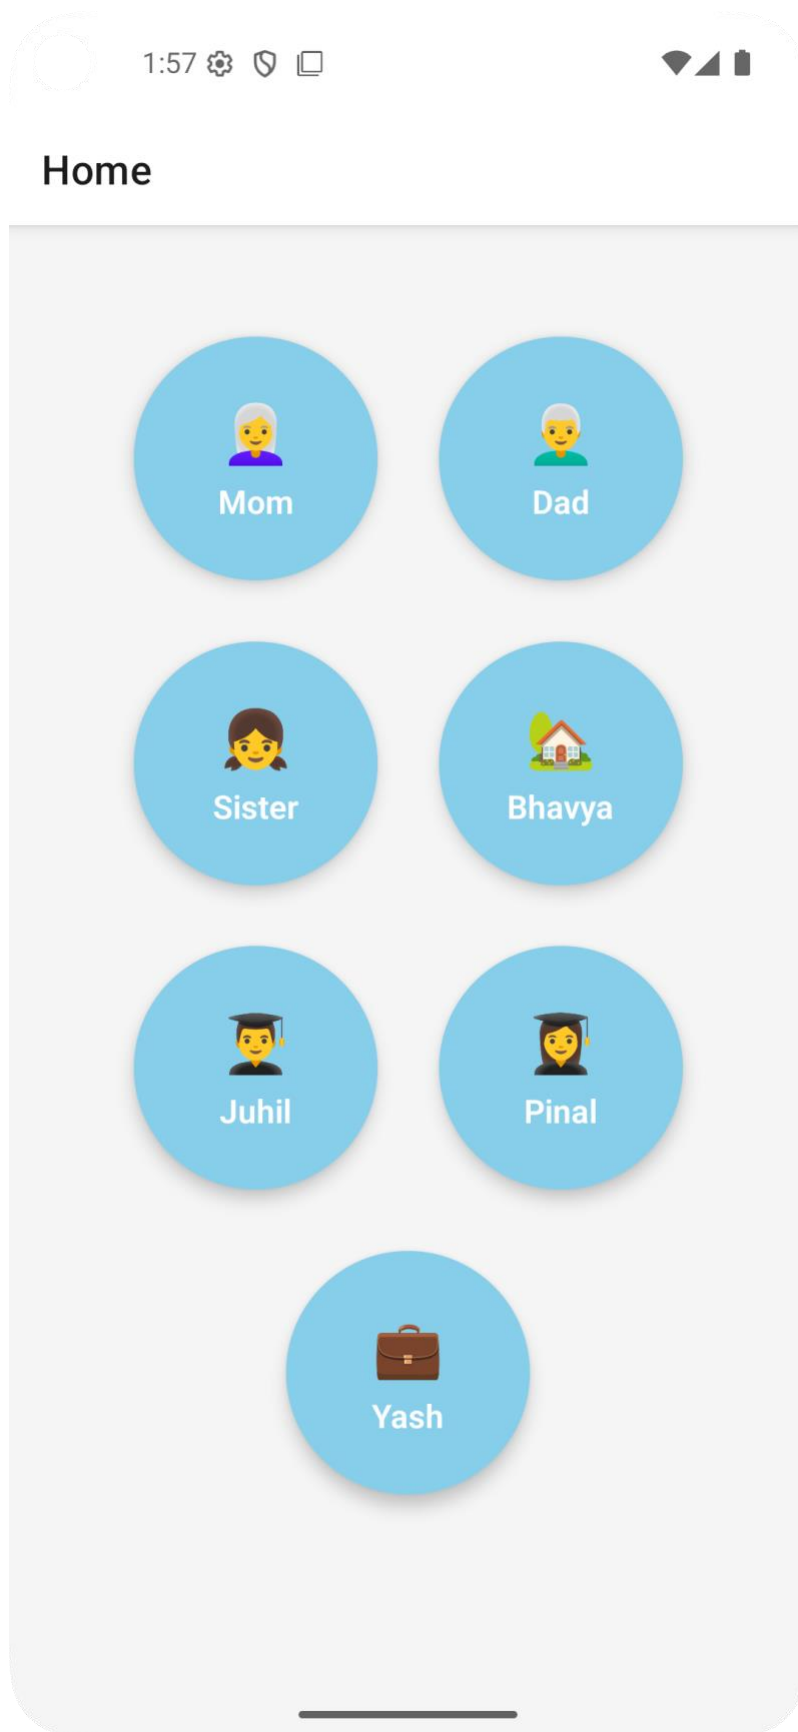

```
cd react-native-messages-directory
```

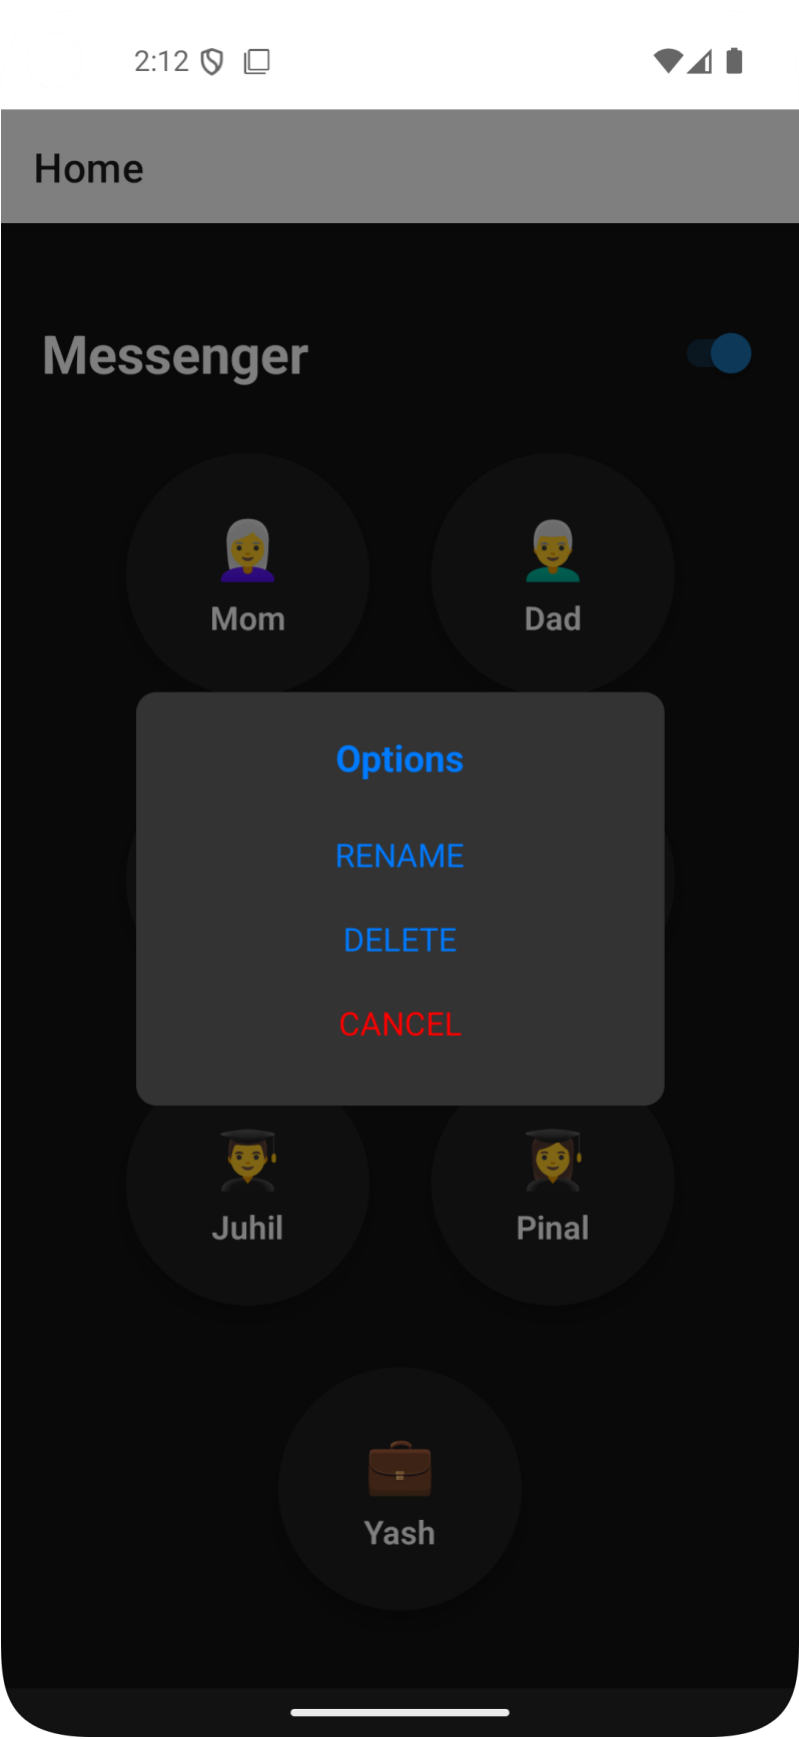

```
npm install
```

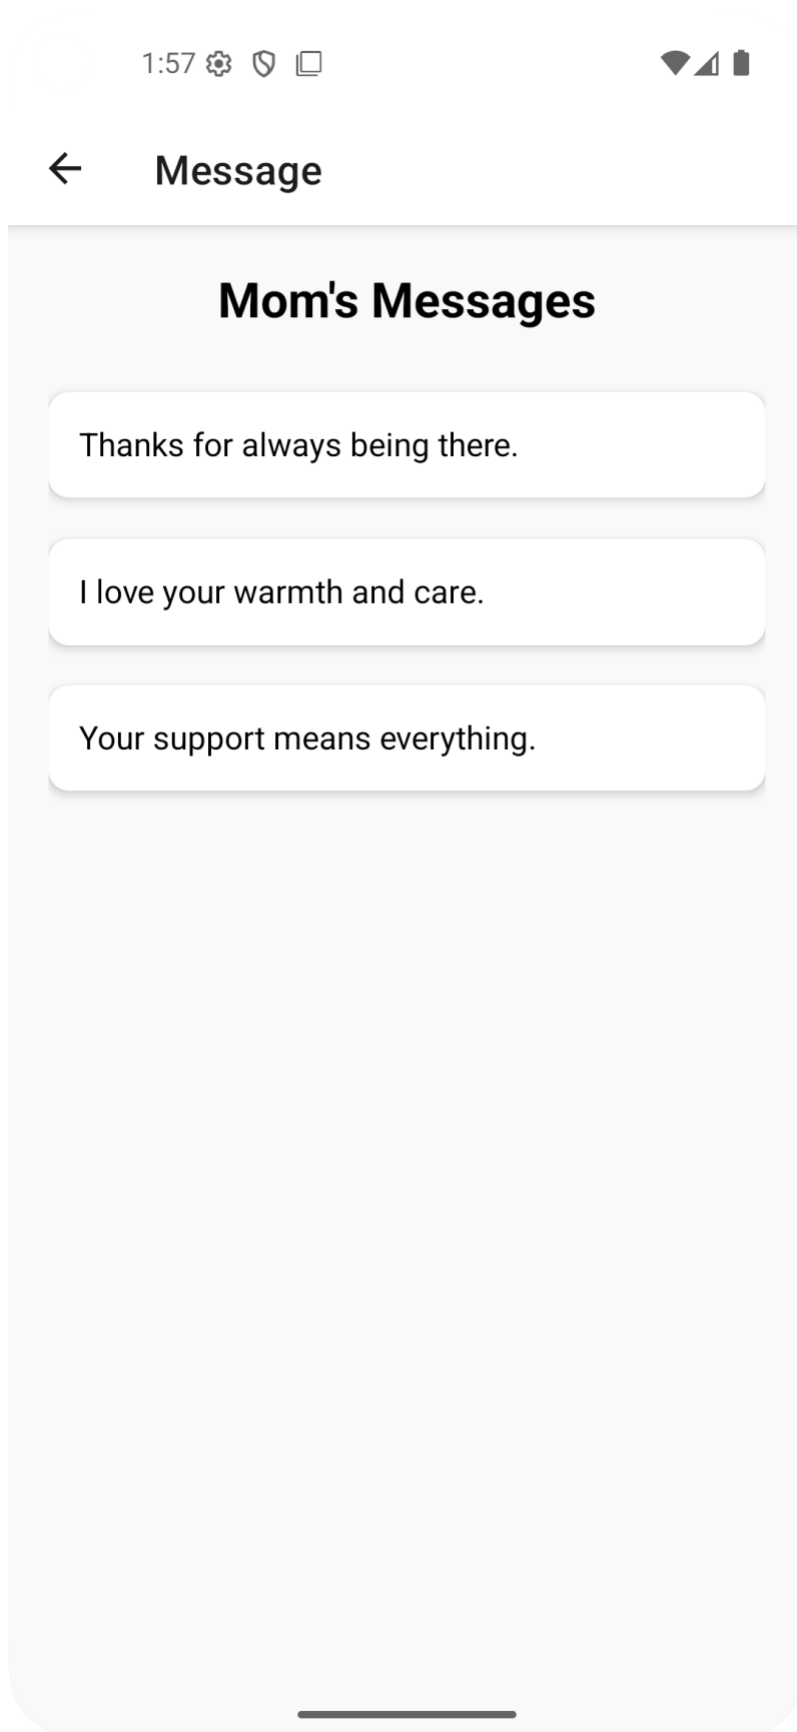

```
npx expo start
```

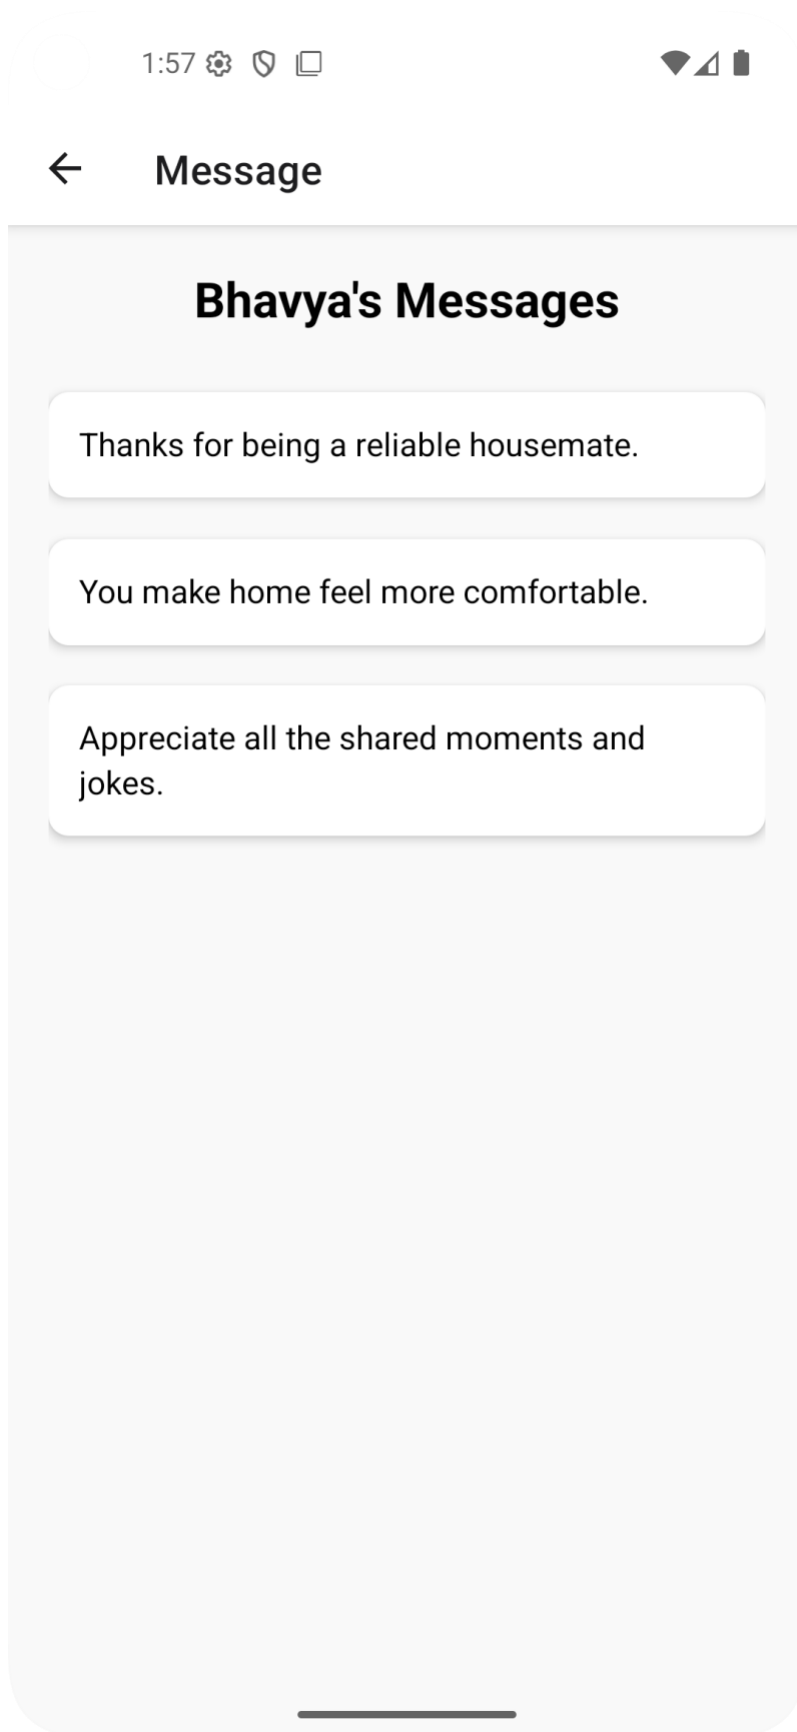

Scan the QR code using **Expo Go** or click “**Run on Android Emulator**” in your browser.

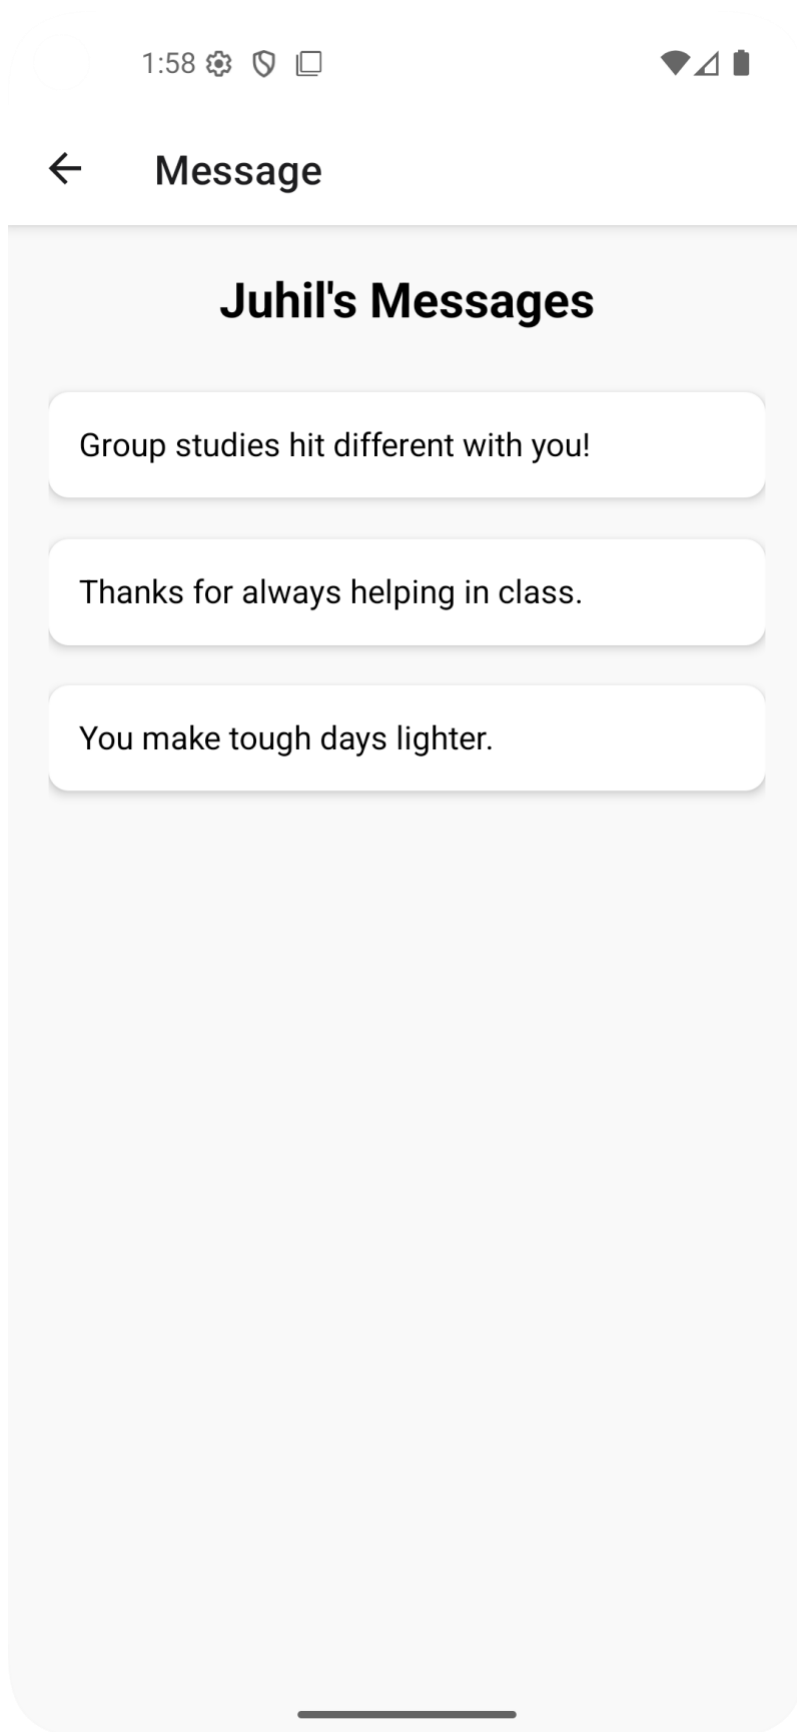

## SCREENSHOTS

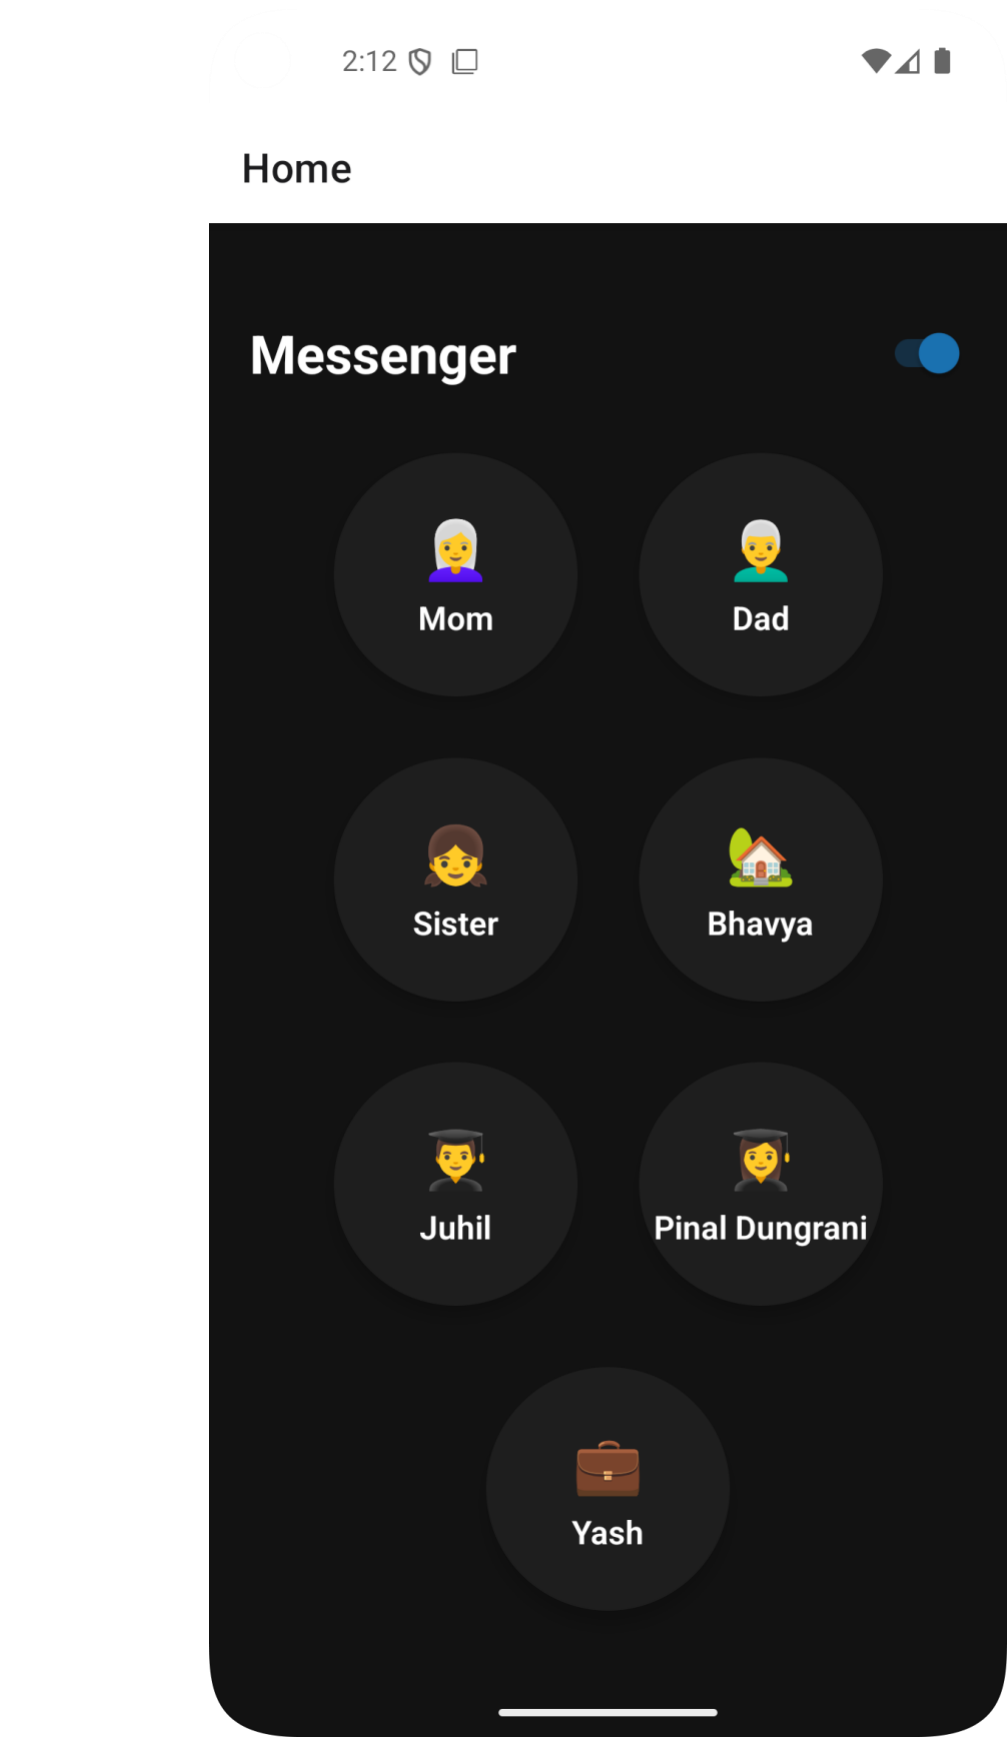

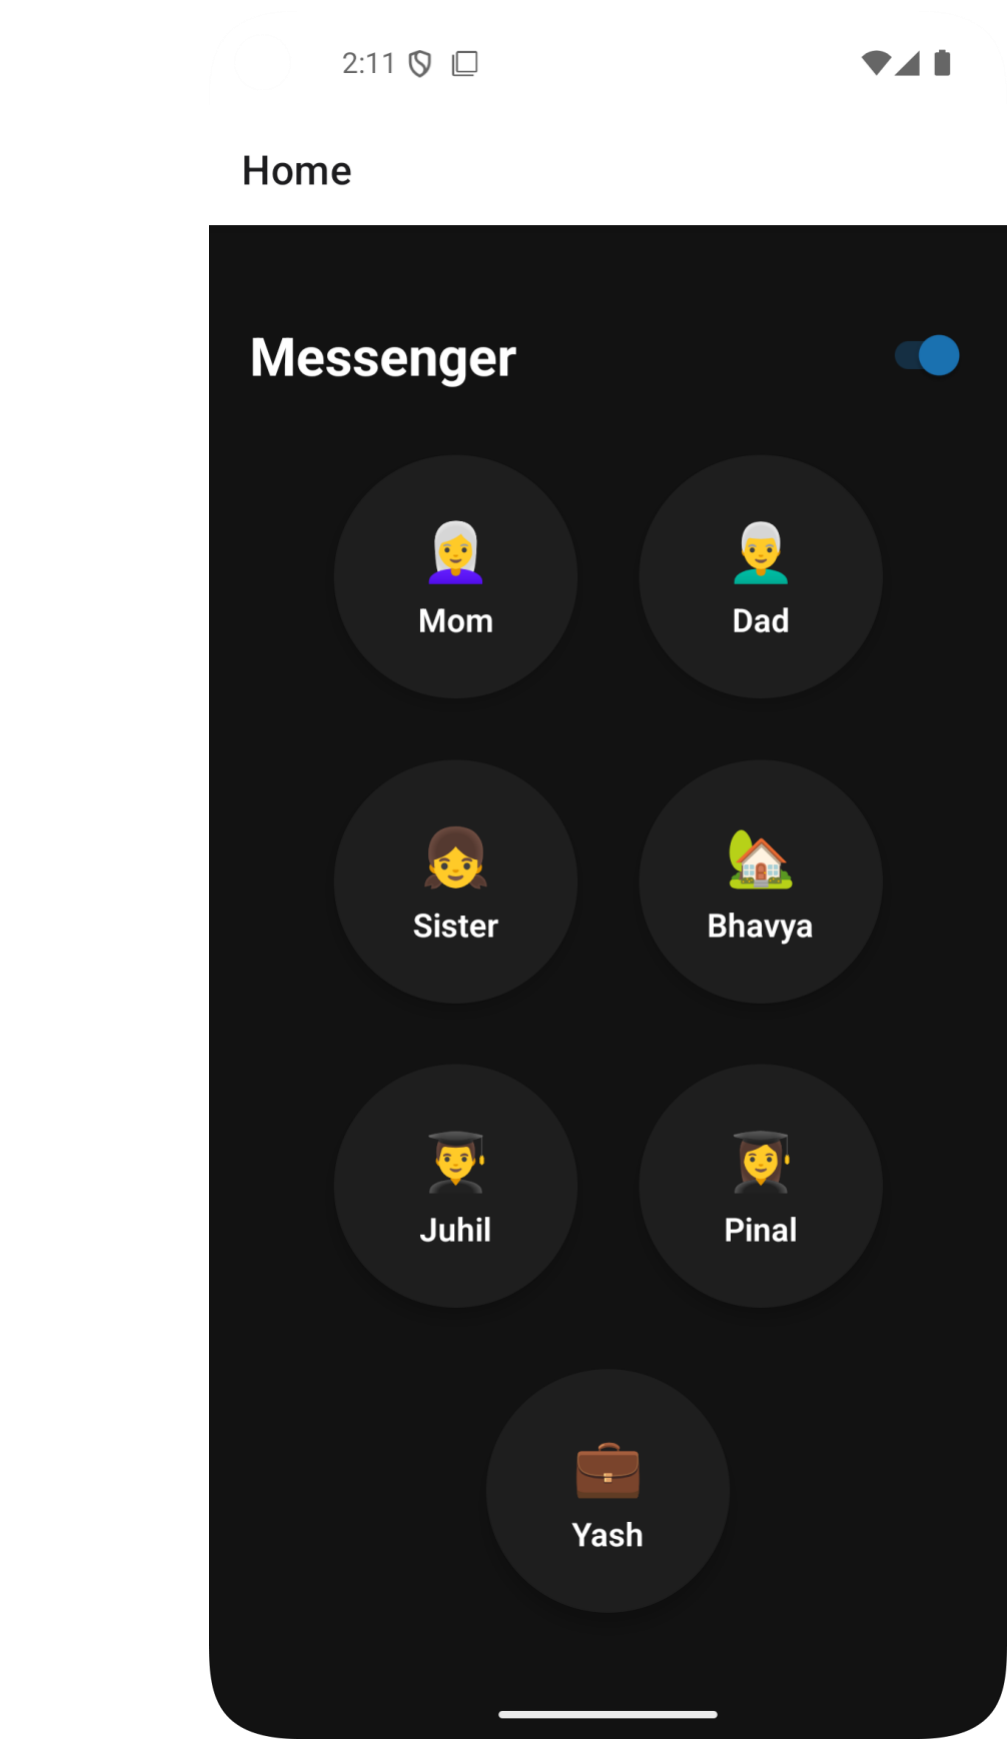

# GITHUB

LINK: <https://github.com/VivekSheth45/react-native-messages-directory.git>

The screenshot shows the GitHub interface for the repository 'react-native-messages-directory' by user 'VivekSheth45'. The repository is public and has 1 unwatch, 0 forks, and 0 stars. The main branch is 'main'. The repository contains a list of files and folders, all committed 11 minutes ago. The files include .idea, assets, screens, .gitignore, App.js, Updated\_home.png, app.json, edit.png, home.png, index.js, message1.png, message2.png, message3.png, night\_Home.png, package-lock.json, and package.json. The repository also has a README file. On the right side, there are sections for 'About' (no description), 'Releases' (no releases published), 'Packages' (no packages published), 'Languages' (JavaScript 100.0%), and 'Suggested workflows' (Gulp and Deno).
